

## Application Example:

## Surveillance from home

C-MOR

### Application Area and Function

A business owner cannot always be at the company to make sure all things are right. Common video surveillance systems only allow you to watch recordings at the location the surveillance system is running. With C-MOR it is possible to access cameras, as well as previous recordings, remotely from home. Just have a brief look on the home computer and you are sure everything is right in the company.

### Used Components

C-MOR3P, Linksys router, 3x Trendnet cameras. Bundle price for 1000 Euro
