

Press Release

New Installation Software Facilitates Installation of C-MOR Video Surveillance

C-MOR Inc., manufacturer of the innovative IP video surveillance solution C-MOR, launches new installation software for the configuration of C-MOR video servers. The sophisticated display and platform independent software repeatedly facilitates the network configuration of C-MOR video surveillance.

Lake Forest, California, March 16th, 2010

The configuration of C-MOR video servers has never been complicated - but the new installation software is even user-friendlier. C-MOR's latest innovation enables users to transfer customer-specific network configurations directly to the C-MOR in the network with just one click. A clearly arranged input mask and very clear and well-defined functions make it very easy for users to get their appliance started, even without any previous experience.

IPsetup for easy network configuration

Currently all appliances are already delivered following the new setup-routine. The software, as well as the video server are fully operational on all operating systems and can be started without installation on any computer. In this way the software development team at C-MOR Inc. sticks to its principles of developing only software that does not require any additional software installation and runs without limitation on all operating systems.

Currently all appliances are already delivered following the new setup-routine. The software, as well as the video server are fully operational on all operating systems and can be started

without installation on any computer. In this way the software development team at C-MOR Inc. sticks to its principles of developing only software that does not require any additional software installation and runs without limitation on all operating systems.

„Our philosophy has always been to provide our customers with software and appliances that work smoothly on all platforms without any need for additional modification”, says Michael Reuschling, CEO of C-MOR Inc. Visibly proud he then refers to the high standards that had to be met: „It is not always easy to respond to the numerous factors of other manufacturers’ different operating systems and browsers, but with this solution we once more succeeded in satisfying the high requirements and are head and shoulders above similar solutions.“

Besides the simplified initial installation, also the support of already existing appliances has been facilitated for on-site technicians. In order to access C-MOR appliances the operator simply has to assign a temporary network address to the video server in the network.

Security still is C-MOR’s first priority: in order to be able to transfer a configuration to the appliance, a corresponding MAC address (unique identification characteristic for network appliances) and main password are mandatory.

The software, together with an online live demonstration, can be easily accessed over the manufacturer’s website <http://www.c-mor.com>.

Prices and availability

From now on C-MOR servers will be delivered including the new software on CD, which can be operated with all “+” models from version 3.61. Besides a free upgrade function on C-MOR’s web interface enables users to get the latest version online, using the comprehensive customer service by C-MOR Inc.

PR contact and vendor information

About C-MOR:

Since 2003 the video surveillance solution C-MOR has been convincing users on the international market. Numerous features have been constantly developed to meet increasing

demands of customers. Excellent performance, reliability and stability characterize the innovative solution. Features like remote access from all over the world, alarm functions, motion detection, hard drive storage management etc. are standard. C-MOR is a very reliable high-quality product, which is permanently developed further in order to meet the constantly growing needs of the market.

About C-MOR Inc.:

Since the beginning in 1996 when Michael Reuschling and Peter Steinhilber founded the mother company C-MOR Inc. in Germany, they have convinced customers as an Internet provider with custom-tailored and reliable service. Since 2003 the company has also been successfully offering customer-specific solutions in the field of video surveillance. In 2007 C-MOR Inc. in the US was founded. From the beginning, broad skills and expertise, trustworthiness, flexibility and pioneering spirit have characterized C-MOR Inc. as a very solid business partner and the continuously growing company will also in the future do everything to meet the demands of their clients.
