

C-MOR-Video – New Version 3.10

## **The New Generation Of Video Surveillance**

Lake Forest, September, 2<sup>nd</sup> 2008 – C-MOR Inc., since years a successful provider in the area of innovative video surveillance systems - announced the launch of the latest version of C-MOR-Video: 3.10

The brand new C-MOR-Video version offers users easy access to various new features:

From now on users using version 3.10 will be able to operate PTZ cameras without difficulty via Palm handheld or Windows Mobile. With just one click the user can start running preconfigured cameras. This enables the operator to always keep himself updated about what is happening where a camera is installed.

Apart from that the new software scores points by optimized usability and additional features, such as e.g. individual configuration of various PTZ camera models via a user-friendly web interface. In addition each individual camera can have assigned user rights.

Furthermore a big plus is the fact that it is still not necessary to install additional software (no ActiveX, no Java).

C-MOR customers already working with version 3.0 or any higher release can now easily upgrade online in order to be able to use the advantages of the brand-new version as soon as possible.

From now on the C-MOR website also offers the latest camera models which have been recently added to the online portfolio.
